关于对国家重点研发计划“政府间国际科技创新合作”等2个重点专项 2025年度有关批次项目申报指南征求意见的通知

发布时间：2024年09月27日 来源：科学技术部

To jointly address a series of global challenges such as global change, food security, energy and resource shortages, population health, and environmental pollution, the Ministry of Science and Technology of China has launched key special projects such as "intergovernmental international scientific and technological innovation cooperation". This project will support intergovernmental scientific and technological cooperation with various countries, regions, international organizations, and multilateral cooperation mechanisms, covering areas such as sustainable agriculture, food and biotechnology, information and communication technology, health, and biomedical sciences.

About Peking University Third Hospital

Peking University Third Hospital is a comprehensive tertiary hospital that integrates medical treatment, teaching, scientific research, prevention, rehabilitation, and health care. It was founded in 1958 and is managed by the National Health Commission. It is the only athlete injury prevention and treatment center designated by the Chinese Olympic Committee and the General Administration of Sport of China. It is also a designated medical hospital for the Beijing 2022 Winter Olympics Organizing Committee, responsible for providing medical services for the Winter Olympics and Paralympics.

The Orthopedics Department of Peking University Third Hospital is a national key discipline with leading academic field in China and possesses international influence. In 2007, it was awarded the title of "Innovation Team" by the Ministry of Education, and in 2019, it was approved to build the Engineering Research Center of "Bone and Joint Precision Medicine" by the Ministry of Education. In 2021, it ranked third in orthopedics in the five-year Total Science and Technology Value (ASTEM) ranking of Chinese hospitals released by the Chinese Academy of Medical Sciences.

At present, Orthopedics Department has 8 wards with a total of 272 beds, and the bed utilization rate is over 95%. There are a total of 75 specialist doctors, including 32 chief physicians, 16 deputy chief physicians, 17 doctoral supervisors, and 15 master's supervisors. Five of them have engaged in postdoctoral research experience, and over 80% of

physicians have obtained doctoral degrees. In 2022, while actively carrying out epidemic prevention and control, the annual number of surgeries exceeded 14000, the number of outpatient and emergency visits was 200000, the case mix index (CMI) was 2.20, and the average length of hospital stay in the general department was 5.67 days, which is at the international leading level in terms of medical efficiency, medical safety, and difficulty.
